

Face Recognition Terminal

TSF-06

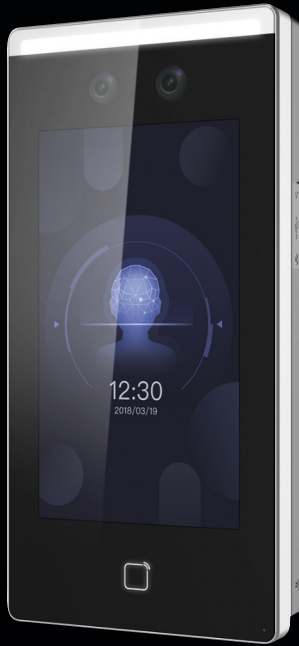

CONTACTLESS FACE RECOGNITION TERMINAL

TSF-06 is a contactless face recognition terminal which provides users convenience, hygiene, higher security, and economical access control.

It can be utilized in a variety of application areas for access control and T&A: IBS, factories, construction sites, army, etc. Based on a state-of-the-art deep learning algorithm, it provides industry-leading recognition accuracy even in a very low illumination environment. It can even verify or recognize users with face masks. Its face recognition speed and accuracy enable a user to be recognized while he/she is just passing by.

Feature

1:N < 0.2S

Deep learning algorithm

Prevent backlight interference

IP65, outdoor use

Video recording function

7" touch screen

Specification

SIZE	239mm x 116.5mm x 33mm
DISPLAY	7-inch / Touch Screen
CAMERA / LENS	2 MP / Dual-lens
CAMERA RESOLUTION	FHD 1024*600
USER LIMIT / CAPACITY	Face : 6,000, Card : 6,000, Event : 50,000
OPERATIONAL TEMPERATURE	-30°C to +60°C
FACE RECOGNITION DISTANCE	MIN 0.3M MAX 3M
FACE RECOGNITION TIME	< 0.2 sec/user
INTERFACE	Network × 1, RS-485 × 1, Wiegand × 1, USB × 1, alarm output × 1, alarm input × 2, lock × 1, door contact × 1, exit button × 1, tamper × 1
NETWORK	10/100/1000 Mbps self-adaptive
POWER	12VDC/ 2A
ACCESORIES	Stand bracket, table bracket, outdoor bracket

* Accesories are sold separately.
